

YUU (BAYU ANGGARA)

SENIOR FULL STACK WEB DEVELOPER & AI ENGINEER ASPIRANT

Email: yulverynthbusiness@gmail.com | LinkedIn: linkedin.com/in/bayu-anggara-715b813b2 | GitHub: github.com/Arterouss
Location: Bandung, Indonesia | Availability: 100% Remote / Global Collaboration | Experience: 4+ Years

PROFESSIONAL SUMMARY

Passionate Senior Full Stack Web Developer dedicated to building high-velocity, visually stunning web applications that deliver exceptional user experiences. With over 4 years of deep technical immersion across modern JavaScript ecosystems, cloud architecture, and frontend systems, I transform complex requirements into fast, intuitive, and highly scalable web platforms combining zero-compromise engineering with premium spatial design.

TECHNICAL SKILLS & CORE COMPETENCIES

Frontend Engineering:	Next.js 16 (App Router), TypeScript, React 19, Tailwind CSS v4, Framer Motion, GSAP, 3D Glassmorphism
Backend Architecture:	Node.js, PHP, Laravel Framework, RESTful APIs, Firebase Cloud Firestore, MySQL, Serverless Systems
Cloud & Performance:	Vercel Deployment, GPU-Accelerated CSS Lighting, 100% Lighthouse Performance, Encrypted Relay APIs
Engineering Practices:	Type-Safe Architecture, Git / GitHub Workflows, Agile Methodology, AI Systems & Prompt Engineering

PROFESSIONAL EXPERIENCE & MILESTONES

E-Learning Platform Developer (Magang/Internship)

2026

Yota Adiwidya Center

- Spearheaded the backend and web architecture of an enterprise-grade E-Learning web portal utilizing PHP and Laravel Framework.
- Engineered relational database schemas in MySQL for structured course delivery, interactive modules, and student progression tracking.
- Optimized application performance through clean repository patterns, robust validation, and responsive UI integration.

Next Career Milestone: AI Engineer / Full Stack Specialist

Coming Soon

Actively researching and preparing for deep immersion into Artificial Intelligence engineering, LLM application architecture, and multi-agent system workflows.

EDUCATION & ACADEMIC BACKDROP

Universitas Informatika dan Bisnis Indonesia (UNIBI)

2023 — Present

Bachelor of Computer Science (S1) — Teknik Informatika

Core coursework and deep technical focus in Software Engineering, Web Systems Design, Cloud Architecture, Algorithms, and Database Engineering.

NOTABLE ENGINEERING PROJECTS

YuuUnivers — Next.js 16 3D Spatial Portfolio & Cloud Firestore CMS

Engineered a state-of-the-art web application featuring GPU-accelerated cinematic environmental lighting, 3D floating glassmorphism UI, real-time Firebase authentication & database admin CMS, and FormSubmit.co encrypted contact portal.
